

# Member Spotlight

Condition: Pediatrics, sleep

## Health concern

After seeing many specialists, participating in sleep studies, having several procedures, and trying every recommended treatment without success, a discouraged and frustrated Carley reached out to Summus for help with her 12-year-old daughter's severe sleep issues.

## Member impact

Summus connected Carley with Dr. Tracy Burton, a pediatric Summus MD, who talked with her for an hour and set up a virtual specialist consultation with pediatric pulmonologist, Dr. Suzanne Beck, Medical Director of the Sleep Center at Children's Hospital of Philadelphia. Dr. Beck recommended an alternate sleep therapy they had not yet tried.

*After seeing four different doctors, she [Dr. Beck] finally gave us a clear path to follow for treatment. There is no way we could have done any of this without Summus. There is no way to interact with and have real meaningful conversations with all these specialists from across the country any other way. Thank you so much for helping our family.*
