## Concern: Women's health, surgery

### Health concern

Greta reached out to Summus the day before her scheduled surgery to remove her ovary. She was feeling anxious and apprehensive and wanted to discuss her concerns.

### Member impact

Summus quickly connected Greta with Dr. Colleen Tenan who discussed the reasons for having the surgery versus monitoring the growth of the cyst on her ovary and recommended a virtual consultation with leading specialist, Dr. Suzanne Fenske, Assistant Clinical Professor at Mount Sinai. Dr. Fenske talked with Greta about her upcoming surgery, recent research, and risks of not having the surgery.

*The call went great, and Dr. Fenske was very helpful. After the call I was wishing she could be my doctor. I am very impressed with Summus and your quick response being able to speak to both doctors. I have told several coworkers about Summus.*
